KEY INSIGHT: Offline Store dominates revenue (70.6%) but has the **lowest GM% (29.58%)**. Facebook Shop — smallest channel — delivers the **highest AOV (399K VND)** and highest margin (32.09%). Online channels depend on promotion 2–3× more than offline (Shopee 18.05% vs Offline 6.72%). Growing online without controlling promo depth risks aggregate margin dilution.

Total			10005748000	34.40%	

KEY INSIGHT: Health & Wellness + Personal Care = premium tier (high revenue AND high margin). Dairy + Fresh Convenience = structural concerns (margin below 20%). 62 A-group SKUs generate 79.86% of all revenue — protecting their availability is the top priority. P0189 (Dairy) = high-revenue but only 15.02% GM → pricing/cost review warranted.

⚡ Stockout Risk Priority: Channel × Category (Rate × Margin)

Channel	Category	Stockout Rate %	Net Sales	Gross Margin %	Stockout Priority
Website	Health & Wellness	0.05	281958000	46.33%	HIGH PRIORITY
Facebook Shop	Beverages	0.04	22367000	25.59%	LOW
Facebook Shop	Fresh Convenience	0.02	9383000	15.09%	LOW
Facebook Shop	Home Care	0.02	39201000	25.47%	LOW
Facebook Shop	Instant Food	0.04	19466000	26.55%	LOW
Facebook Shop	Personal Care	0.04	103318000	35.09%	LOW
Total		0.04	28915997000	30.18%	MEDIUM

KEY INSIGHT: Promotion destroys margin in every category. **Fresh Convenience** is the most extreme: GM collapses from 16.85% to **0.63%** with promotion. **H&W is the most resilient:** promo GM stays at 35.80% — suggesting pricing power. Return risk concentrates in TikTok × H&W (**12.52%**). Stockout priority: **Website × H&W** ranks higher than Website × Dairy despite lower rate — because H&W's 47.25% GM means each stockout destroys more profit.
